Response to Amendment

The objection regarding the abstract and the title of the invention is withdrawn in view of the amendment.

· Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 recites the limitation "the signal parameter condition in claim 2" in line

1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Bahl et al. (EP 0 788 090).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/786,290

Art Unit: 2655

Claims 4-6 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bahl as applied to claims 1-3 and 7-9 above, and further in view of Vikram Krishnamurthy et al. ("on-line estimation of hidden markov model parameters based on the kullback-leibler information measure" IEEE trans SP, august 1993).

See the preceding office action for the details regarding the reasoning for the rejection of claims 1-11.

Response to Arguments

Applicant's arguments filed 9/16/2003 have been fully considered but they are not persuasive.

Applicant argument based on the assertion that Bahl does not perform initial estimation is traversed. According to Bahl an input signal is, initially, processed so as to identify and select the proper model, once a proper model is selected then the utterance is processed for recognition.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wakisaka et al. (6,148,105), see the entire document.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/786,290
